

Immersive Technologies' TabliT™ Trainer Console provides wireless training control

15 October 2008

Perth, Australia

Immersive Technologies puts simulator training into the palm of your hand with the launch of the TabliT™ Trainer Console, a portable, hand-held computer interface for the Advanced Equipment (AE) Simulator.

The TabliT™ Trainer Console increases training flexibility by allowing trainers to remotely launch operator events and emergency situations with wireless technology and receive real-time feedback whilst the trainee operates the Advanced Equipment Simulator.

This "roaming" aspect of the console provides the trainer with increased freedom and faster access to numerous training scenarios, whilst maintaining complete supervision of the training session.

Oye Obe, Executive Vice President Business Development at Immersive Technologies says: "The portability of the TabliT™ Trainer Console increases trainer freedom, whilst the touch screen feature allows trainers to focus on the trainee rather than being concerned with the technology. Overall, this improves both the efficiency and effectiveness of the training session."

###

About Immersive Technologies

Immersive Technologies is the world's leading supplier of operator training simulators used in the mining and earthmoving industries. We have 380 simulator modules at 155 locations in 23 countries.

Our Advanced Equipment (AE) Simulators are considered vital to many of the world's leading mining companies such as BHP Billiton, and CVRD. From the Congo to northern Canada, mines are increasing safety and reducing their cost per tonne by using our simulators daily to train and test their operators.

We have exclusive licensing and technical information alliances with the leading Original Equipment Manufacturers (OEM), including: Bucyrus, Caterpillar, Hitachi, Komatsu and Liebherr.

Our customer support offices are located in Perth and Brisbane Australia, Salt Lake City USA, Johannesburg South Africa, and Santiago Chile.
