

## Immersive Technologies extends its long-standing relationship with Caterpillar for Simulation

2 December, 2009  
Perth, Australia

Immersive Technologies and Caterpillar Inc. have signed the renewal of a global Technical Information and Licensing Agreement for the development of advanced equipment training simulators.

The scope of this agreement sees Caterpillar continue to exclusively provide Immersive Technologies with confidential machine technical information and data that is necessary to simulate Caterpillar machinery. This proprietary information is not available or accessible to any other advanced simulator vendor.

"Access to technical information from Caterpillar allows Immersive to authenticate its simulators and provide its customer with value and confidence.", said Peter Salfinger, CEO Immersive Technologies.

"Immersive Technologies is proud of its long standing alliance with Caterpillar. This renewal ensures the latest and most accurate training technology and features are engineered into our Caterpillar type simulator training solutions. This arrangement reflects our ongoing desire to develop a strong business relationship with Caterpillar that will benefit our joint customers.", said Peter Salfinger.

As part of this agreement Caterpillar Global Mining will continue to exclusively recommend Immersive Technologies' advanced training simulators to Caterpillar dealers and mining customers worldwide.

### About Immersive Technologies

Immersive Technologies is the world's leading supplier of operator training simulators used in the mining and earthmoving industries. We have 480 advanced mining equipment simulator modules in 28 countries.

Our Advanced Equipment (AE) Simulators are considered vital to many of the world's leading mining companies such as BHP Billiton, VALE and Rio Tinto. From the Congo to northern Canada, mines are increasing safety and reducing their cost per tonne by using our simulators daily to train and test their operators.

We have exclusive licensing and technical information alliances with the leading Original Equipment Manufacturers (OEM), including: Caterpillar, Hitachi, Komatsu, Liebherr and P&H MinePro.

Our customer support offices are located in Perth and Brisbane Australia, Salt Lake City USA, Calgary Canada, Santiago Chile and Johannesburg South Africa.
